Career Objective

Recently completed Diploma in Computer Science Engineering with strong knowledge of Full-Stack Development (C#, ASP.NET, MVC, JavaScript, React, SQL, HTML, CSS). Seeking an entry-level developer role to apply problem-solving skills and contribute to organizational growth.

Core Skills

- Programming: C#, ASP.NET, MVC, Java, JavaScript
- Frontend: HTML, CSS, Responsive Design
- Backend: ASP.NET, MVC, Authentication
- Database: MS SQL Server
- Tools: GitHub, Visual Studio, VS Code

Experience

I worked as an IT Support Technician on a temporary basis for two months at the Ordnance Parachute Factory.

Projects

Movie Website: Developed a dynamic web application with user authentication, movie listings, blog publishing, and secure registration. Built an admin panel for content and user management.

Pizza Restaurant Web App: Designed a food ordering web application with interactive menu, cart, and customizable toppings. Tech Stack: HTML, CSS, JavaScript, ASP.NET, SQL Server.

IIMM Ayodhya Clone: Replicated layout and features of IIMM Ayodhya website. Implemented professional UI, responsive design, and navigation for learning purpose.
